

Part Number: M-V85-GL(E)

Description: Canyon Dual Sport Saddle

Fitment: 2019-2025 Moto Guzzi V85 TT & Strada

Revision: 1

Tools Required	Parts List
8mm Socket Wrench Needle Nose Pliers	1 #FACC-05 Small Fuse Adapter 1 #Ph-CB-HL-1 Wiring Harness (Pigtail) 1 6" Zip Ties

SADDLE INSTALLATION:

1. Remove your stock seats. Refer to your owner's manual if necessary.
2. Saddle mounts just like stock with brackets preinstalled on the saddle.
3. To install your saddle, slip the two front tongues of your saddle into place, align the Corbin latch pin to the stock locking mechanism and push down on the saddle until you hear the lock click (*Figure 1*).

HEATER INSTALLATION:

1. If you ordered the heated model, we also included a wiring pigtail that hooks into your stock fuse box. Open the fusebox cover.
3. Remove the fuse from the #1 position (*Figure 2*) and insert the fuse into the adapter at the end of the wiring pigtail.
4. Insert the adapter in the space previously occupied by the fuse in the #1 position (*Figure 3*), then gently close the fuse box cover (*Figure 4*).

NOTE: With the pigtail in place, the fuse box cover won't close completely.

5. Attach the ground wire to the battery negative as shown in *Figure 5*, but any location with good contact to ground will work fine.

6. With the provided zip tie, secure the wiring harness neatly out of the way before mounting the seat to prevent potential damage. (Figure 6)

7. Plug the pigtail into the fuse adapter (Figure 7).

8. Connect seat plug to the pigtail.

9. Test the seat. To do this, turn on your ignition switch and flip the switch on the saddle. If the switch illuminates, the saddle heater is working.

10. Proceed with saddle mounting as outlined above.

Enjoy your new saddle!

NOTE: The heater is controlled by the switch along the side of the saddle. The temperature is regulated by an internal thermostat when the heater switch is turned on.

WARNING!

Heater elements should **NEVER** be installed in motorcycle seats used by riders that cannot sense heat.
